Flame retardants

Leave It to the Artists to Burn Up the Boards

Retardant Product Information

JD International is introducing a new range of extinction and fire prevention products which are effective yet not dangerous. With our new "FIRETECT" line of products, we are able to offer you a solution for almost any fire prevention task. Whether it be for wood, straw, fabrics and even Christmas trees, we have the appropriate product.

SAFE-T-GUARD FLAME RETARDANT FOR FABRIC, WOOD, CARDBOARD AND PAPER

FABRIC INFORMATION: Class 1 flame retardant for fabric. Covers 200-800 square feet per gallon. No smell, non-greasy, will not leave white, flaky residue behind, shrink or change the appearance of 99% of fibers on the market. Can apply right on-site, no dipping. Can be used on most metallic, synthetic and other delicate blends of fibers when most other flame retardants will not work. Works excellently on paper, cardboard and other decorative materials.

WOOD INFORMATION: Class 2 flame retardant for wood. Coverage is 240 square feet per gallon. Excellent for use on hard or soft wood. Spray on or off-site.

SAFE-T-GUARD contains no volatile organic compounds.

WT-102 LATEX FLAME RETARDANT PAINT

Class 1 flame retardant for wood. Coverage is 100 square feet per gallon with 2 coats (or 200 square feet per gallon). Can be used as a primer. Excellent coverage where a Class 1 flame spread is desired. Available in white, black and color-base for custom tinting. Custom color mixing is available.

WT-103 CLEAR FLAME RETARDANT COATING

Class 2 flame retardant for wood. Coverage is 100 square feet per gallon with 2 coats (or 200 square feet per gallon).

FR-10 FLAME RETARDANT VARNISH

Class 2 flame retardant varnish. Coverage is 200 square feet per gallon with 1 coat. FR-10 is a clear, durable, washable coating suitable for interior and exterior use. Can be used in conjunction with WT-102 for increased flame spread and seal protection.

FIRE-SAFE FLAME RETARDANT FOR HAY AND STRAW

Class 1 flame retardant for hay, straw or dried palm leaves (thatching). Coverage is 200 square feet per gallon.

TREE-SAGE LATEX FLAME RETARDANT FOR CHRISTMAS TREES

Class 1 flame retardant for Christmas trees. Coverage is 100 square feet per gallon with 2 coats (or 200 square feet per gallon).

PC-201 FLAME RETARDANT FOR FOAM

Provides flexible flame retardment for polyurethane, polyester and polyethylene foams and other cushioning materials. Coverage is 75-200 square feet per gallon in 2 coats.

OTHER PRODUCT AVAILABLE: INSPECTA SHIELD

See product data sheets for specific product information and application directions.

Service

JD International offers the services of certified applicators, which means that the job comes with a flame retardant certificate, is recognized by Canadian, American and British authorities.

The state of California and New York requires certified licensed applicators to apply flame retardant products and to issue a certificate of compliance.
